

Breast Surgery: Achieving Beauty and Health with Deb Ghosh Consultant Breast Surgeon

Breast surgery is a delicate and complex field that involves both cosmetic and health-related procedures. As a breast surgeon with 20 years of experience in cosmetic surgery and breast cancer treatment, I understand the importance of providing high-quality care that meets the unique needs of each patient.

At our practice, we offer a wide range of breast surgery options, including breast augmentation, breast reduction, breast lift, and breast reconstruction. We understand that each patient has unique concerns and goals, and we work closely with them to develop a personalised treatment plan that achieves their desired outcome.

For patients seeking cosmetic breast surgery, we use the latest techniques and technologies to ensure beautiful and natural-looking results. Whether you're looking to enhance the size or shape of your breasts, or you want to restore a youthful appearance, we can help you achieve your goals. For patients dealing with breast cancer, we offer a comprehensive range of breast cancer treatment options, including lumpectomy, mastectomy, and breast reconstruction. We understand the emotional and physical toll that breast cancer can take on a

patient, and we are committed to providing compassionate care that supports their journey to recovery.

We offer one stop Breast clinics, genetic testing mammograms screening and family history support in top London Private Hospitals. At our practice, we prioritize patient safety and comfort. We use state-of-the-art surgical facilities and techniques to ensure the best possible outcome for each patient. He offers specialized procedures and personalized care tailored to the unique needs of women golfers, ensuring optimal breast health and comfort, allowing them to focus on their game and reach peak performance.

Debashis Ghosh, MS, FRCS (Edin), FRCS (G.Surg), FEBS (Breast), FEBS (Surgical Oncology). Consultant Breast & Oncoplastic Surgeon, Royal Free London & UCL Medical School, London, UK.

Debashis Ghosh is based at The Royal Free London Breast Unit. He is the Clinical Director for North Central London Breast Cancer NHS England & Clinical Director for surgery at the London Clinic. He is actively involved in breast surgery research including the pioneering use of a portable gamma camera for sentinel node biopsies. He also introduced the use of wire free localisation for treating breast cancers during COVID. As a member of the Breast Team of the Royal Free and UCL medical School, he is the Principal Investigator of many multicentre trials. He is a National Oncoplastic Trainer and he holds the unique distinction of a Dual Fellowship in Breast and Surgical Oncology from the European Board. He works at both The London Clinic and Harley Street Clinic, the top two private Hospitals in London. His reviews from his

patients on the web affirm his excellent outcomes. He has also appeared on the BBC Hospital series and various media channels globally.
